

Replication File for “Defund My Police? The Effect of George Floyd’s Murder on Support for Local Police Budgets”

Michael W. Sances

September 8, 2022

Contents

1	Steps to Replicate	1
2	Description of Included Files	1
3	Software	4

1 Steps to Replicate

1. Download all files in this replication file to a new directory, e.g. *Downloads/police/*
2. Ensure you also have the packages listed under Section 3 installed.
3. Open Stata, set working directory to the directory chosen in step 1 using the “cd” command.
4. To replicate all figures and tables, run `_code/_replicate.do`. To replicate a particular figure/table, run `_code/figure X.do` or `_code/table X.do`

2 Description of Included Files

File	Description
<code>_code/figure 1.do</code>	Reproduces Figure 1 in the main text
<code>_code/figure 2.do</code>	Reproduces Figure 2 in the main text
<code>_code/figure 3.do</code>	Reproduces Figure 3 in the main text
<code>_code/figure A1.do</code>	Reproduces Figure A1 in the appendix
...	...
<code>_code/figure A27.do</code>	Reproduces Figure A27 in the appendix
<code>_code/_replicate.do</code>	Reproduces all figures and tables from the main text and appendix
<code>_code/table A1.do</code>	Reproduces Table A1 in the appendix
...	...
<code>_code/table A29.do</code>	Reproduces Table A29 in the appendix
<code>_output/empty.txt</code>	This directory is where the .do files output tabular and graphical output. In case empty directories may not be uploaded to dataverse, this empty .txt file ensures this directory will be created.
<code>ballotpedia.xlsx</code>	Spreadsheet containing information on 192 police-related ballot measures, as referenced in the appendix.
<code>CODEBOOK.xlsx</code>	Codebook containing variable name and definition for each included .dta file.
<code>dataset_city_selection.dta</code>	Called by .do files for Tables A1, A2
<code>dataset_city_selection_louisiana.dta</code>	Called by .do file for Table A3
<code>dataset_city_selection_texas.dta</code>	Called by .do file for Table A4
<code>dataset_east_baton_rouge_building_permits.dta</code>	Called by .do file for Table A10
<code>dataset_east_baton_rouge_coords_2000.dta</code>	Called by .do file for Figure A4
<code>dataset_east_baton_rouge_coords_2010.dta</code>	Called by .do file for Figure A4

dataset_east_baton_rouge_coords_2020.dta	Called by .do file for Figure A4
dataset_east_baton_rouge_crime.dta	Called by .do file for Table A10
dataset_east_baton_rouge_cross.dta	Called by .do file for Figures 1, 2, 3, and various appendix tables and figures
dataset_east_baton_rouge_cross_pres.dta	Called by .do file for Figures 1, 2, 3, and various appendix tables and figures
dataset_east_baton_rouge_meta.dta	Called by .do files for Table A18, A23
dataset_east_baton_rouge_newspaper_coverage.dta	Called by .do files for Figure A1 and Table A5
dataset_east_baton_rouge_panel.dta	Called by .do files for various appendix tables and figures
dataset_east_baton_rouge_panel_pres.dta	Called by .do files for various appendix tables and figures
dataset_east_baton_rouge_police_violence.dta	Called by .do files for Figures A2 and Table A6
dataset_east_baton_rouge_property_values.dta	Called by .do file for Table A10
dataset_east_baton_rouge_protests.dta	Called by .do file for Table A8
dataset_fort_worth_coords_2009.dta	Called by .do file for Figure A5
dataset_fort_worth_coords_2014.dta	Called by .do file for Figure A5
dataset_fort_worth_coords_2020.dta	Called by .do file for Figure A5
dataset_fort_worth_crime.dta	Called by .do file for Table A10
dataset_fort_worth_cross.dta	Called by .do file for Figures 1, 2, 3, and various appendix tables and figures
dataset_fort_worth_cross_pres.dta	Called by .do file for Figures 1, 2, 3, and various appendix tables and figures
dataset_fort_worth_meta.dta	Called by .do files for Table A18, A23
dataset_fort_worth_newspaper_coverage.dta	Called by .do files for Figure A1 and Table A5
dataset_fort_worth_panel.dta	Called by .do files for various appendix tables and figures

<code>dataset_fort_worth_panel_pres.dta</code>	Called by .do files for various appendix tables and figures
<code>dataset_fort_worth_police_violence.dta</code>	Called by .do files for Figures A3 and Table A7
<code>dataset_fort_worth_property_values.dta</code>	Called by .do file for Table A10
<code>dataset_fort_worth_protests.dta</code>	Called by .do file for Table A9
<code>dataset_other_baton_rouge.dta</code>	Called by .do files for Figures A23, A25
<code>dataset_other_louisiana_parishes.dta</code>	Called by .do files for Figures A22, A23, A26, Table A29.
<code>dataset_other_oak_park.dta</code>	Called by .do files for Figures A22, A24, Table A29
<code>dataset_other_oklahoma_city.dta</code>	Called by .do files for Figures A23, A24
<code>dataset_other_texas_cities.dta</code>	Called by .do files for Figures A22, A24, A27, Table A29
<code>log.txt</code>	Required log file created by <code>_code/replicate.do</code> .
<code>README.pdf</code>	This document.

3 Software

Stata was used to produce all figures and tables. I primarily used Version 16. I have successfully ran the replication files on Versions 14 and 17 as well. The primary operating system used was Linux.

The .do files used to produce the three figures in the main text do not require any additional packages.

The following additional packages are required to run many of the Stata .do files for the appendix figures and tables. Install these using `ssc install [package name]`.

Package	Notes
acreg	For running regressions with HAC standard errors.
egenmore	Used for the “nvals” command, which is used to determine the number of pre/post 2020 elections by jurisdiction.
estout	Used for regression table output.
hdfe	Required by acreg.
listtex	Used for outputting summary tables to LaTeX format.
ranktest	Required by acreg.
spmap	Used to map precincts.
unique	Used to determine number of unique observations.
